

## Service-overview

### From the idea to the series product

- system-analysis, spezifikation
- conception, project-management
- design (development, simulation, layout)
- production-management (production-partner)
- prototyps- and series-delivery, series-test
- qualification, applikation support

### Basics

- consulting for circuit and sensor solutions
- circuit and sensor development
- applications-array, integrated circuits
- production-service for circuits and sensors

### Applications

- integrated circuits: ASSP, ASIC
- sensors: pressure, temperature, humidity, gas, proximity, distance, ultrasonics
- automation, building, medicine, automotive

### From modules to sensor-systems
